

PALAK GARG

Web Developer (PHP / Laravel)

9783383948 | palakgarg3010@gmail.com | [linkedin.com/in/palak-garg](https://www.linkedin.com/in/palak-garg)

SUMMARY

Web Developer with 4+ years of experience in PHP/Laravel building scalable web and mobile-backend systems, including booking platforms, multi-vendor e-commerce marketplaces, REST APIs, and secure payment gateway integrations. Experienced with real-time tracking, push notifications, dynamic pricing engines, and CRM/ERP development. Skilled at leading small development teams, working directly with clients, and using AI-assisted tools to speed up delivery while owning core logic and architecture.

EXPERIENCE

Web Developer

May 2025 - Jun 2026

OweBest Technologies | Mobile App Development Company

- Built a multi-tenant boat rental & booking platform: super admins onboarded sub-admins with independent storefronts, and a calendar-based module showed real-time boat availability by location and date on a subscription model.
- Designed a dynamic pricing engine (frontend + backend) that adjusted boat rates based on demand and live weather data, plus admin controls to create, discount, hold, or cancel bookings with automated refunds.
- Integrated Stripe, Google Pay, Apple Pay, and in-app wallet payments, Google/Apple social login, ID-document upload, and automated invoice generation.
- Set up automated weather-based cancellation alerts and booking reminder/review emails triggered a day in advance.
- Built REST APIs and an admin panel for a multi-vendor e-commerce & delivery platform (multi-currency, multi-language, Paystack, COD) connecting customer, supplier, and driver apps with push notifications and a live driver-tracking/ETA feature.
- Coordinated directly with clients to clarify requirements, managed a 3-member development team, and used AI-assisted coding tools (e.g. Cursor) to speed up delivery while owning core logic and architecture.

Web Developer

Aug 2023 - Mar 2025

Codebeans Pvt Ltd | Web development and digital solutions

- Designed custom Laravel modules for dynamic website functionality and on-demand theme changes based on client requirements; managed complete client websites end-to-end.
- Built a Shopify-integrated "Notify" app: Laravel backend for restock notifications, dynamic email/push templates, and Shopify API triggers.
- Contributed to an internal admin panel to improve management and reporting capabilities.

Web Developer

Mar 2022 - Jul 2023

NLET Initiatives | Dynamic web solutions

- Built fully dynamic Laravel websites for multiple client projects, including custom backend functionality and modules.
- Developed and integrated REST APIs enabling communication between internal systems.
- Collaborated with cross-functional teams to enhance ERP and CRM systems.

EDUCATION

Master of Computer Applications - Nirwan University, Jaipur

2022 - 2024

Bachelor of Computer Applications - MDS University, Ajmer

2019 - 2022
